DETAILED ACTION

Election/Restrictions

This application contains claims directed to TWO GROUPS OF SPECIES from each of which Applicant must elect a single species.

The FIRST GROUP OF SPECIES (i.e., species of design of corridor space having distribution system)

GROUP I, SPECIES I - Fig. 1A;

OR

GROUP I, SPECIES II - Fig. 1C.

The species are independent or distinct because:

GROUP I, SPECIES I (i.e., Fig. 1A) discloses a flooring system wherein the rooms (4, 5) have a slab (60) located on the ground for a floor and the corridor (1) has a system where the condensate opening (55) is located at the low point of two downwardly sloped structures; and

GROUP I, SPECIES II (i.e., Fig. 1C) discloses a flooring system wherein the rooms (4, 5) have a raised floor 13 above a slab (60) located on the ground and the corridor (1) has a system where the condensate opening (55) is located at the center of a horizontal structure.

The SECOND GROUP OF SPECIES (i.e., species of design of corridor space having distribution system)

GROUP II, SPECIES I - fiber optic trays (61A, 61B) and cylinders for fire suppression system (51A, 51B) below floor;

OR

GROUP I), SPECIES II - fiber optic trays (61A, 61B) and cylinders for fire suppression system (51A, 51B) above mezzanine deck.

The species are independent or distinct because they are mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least independent claim 1 appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).

A telephone call to Applicant to request an oral election was not made due to the complexity of the election to the above election of species requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
